

NEWS NEWS NEWS NEWS NEWS

It feels like the world is spinning faster and at the time of writing this newsletter August is just a few days away. Big news is still BotWar with the BotWar 3 PDF rulebook being brought forward to now. Now everyone can start playing Bot War 3. Don't forget all your BotWar 2 forces and stat cards still work so there are no excuses to giving it a go 😊.

Traders Galaxy's MMF Tribes continues to get stronger and stronger with

some pretty fantastic offers for August. Darkstones for Bot War and the complete Motor City Police Department for ROTD, including 80s police cruiser! For the Darkstones we have added lots of cool new golem heads to customise your Stonelords. I definitely expect to see more Darkstone factions getting table time now. Speaking of Darkstone, he is also available in the MMF store as a separate purchase.

Don't forget the Red Cannoneers are currently on preorder as a starter box with new stat cards. Like all starter sets it won't be around forever so preorder in time for it to be shipped with your BotWar 3 set! Finally, we have some great new undead fantasy releases this month including 2 regiments of renown, Mordak's Skeleton Legion and Septek's Tomb Keepers. Both are awesome units for any fantasy game. Kroarok also arrives as our second Snake Cult champion with many more on the way in the coming months, quickly followed by dwarfs!!

– As always, Happy Gaming!
