

NEWS NEWS NEWS NEWS NEWS

Well the crazy month of May is over which had Traders Galaxy attending 2 amazing conventions Bricon and Tabletopcon. Much fun was had and a lot of new players introduced to the awesomeness of BotWar. It is hoped that Traders Galaxy will be attending 3 more conventions this year with October and November being the crazy months. 😊 The Immolators and Starr Defender preorders are all shipped and the birds are singing in the trees! June has been the start of winter here but so far it's been quite mild where Traders Galaxy is located.

But we never stop moving forward here. Much of the metal range has been transferred to resin now and I am using the opportunity to tweak the ranges to how I originally wanted them. Also, due to the success of the MyMiniFactory store, I have moved most of the classic range

from Retro Robots to Bot War under the Legacy heading. Legacy forces are redone classics with full Bot War 3 art and rules. As many know, I have a no Bot left behind policy, and now with the Legacy forces you can give new life to your older Traders Galaxy minis. If you already have the minis, you can just get the new digital stat cards and start playing Bot War 3!

This month saw the release of the long awaited second Bot War Campaign Book and I am quite pleased with the results. The campaign book features a complete timeline of the Bot War universe as well as a new faction, a few new units, 6 new missions and a hex based map! The campaign follows the story from the previous 2022 campaign book and shows where the conflict is now. The big question is, are Electrotyrant and Sonique truly dead or not? The 2025 Bot War campaign book is worth getting just for the read.

The first of July sees Ducal return leading his cool Blue Speedsters Valiants PREORDER. These guys are fast and offer some great game and hobby options. Just be careful, fast also means they are

on the lighter side for Valiants 😊. Also up for PREORDER is The Eagle's War Machines for The Democracy with the devastating C130TG! This powerful Dedicated Flyer rains death from the sky on any enemy the infantry spotters can see.

Work has almost finished on the new Beat Em Up rulebook and final playtesting is expected soon. Beat Em Up will be Traders Galaxy's third boxed game! Very exciting!

And finally, I have started work on aligning every miniature in our 30mm ranges (fantasy, sci fi, 80s pulp, ww2) into our ROTD rules system. This means art and a stat card for every character – Super exciting!
